PUBLISHER'S NOTICE:

This booklet is presented as an aid to the artist, photographer, model and physical culture student. It is designed to enable him to further pursue his studies of the human figure—the fundamental basis of all art. It is the honest and sincere purpose of this publication to capture the lighting, lines, contours and defined shadows in order to assist in making good and authentic reproductions and to aid the model in the learning of new and varied poses.

The primary purpose we have in mind is to inspire both the professional and serious amateur by offering the finest photographic techniques available as a guide to what can be done with a camera, film—and a little patience.

All rights are reserved and none of the contents of this publication may be reproduced in any way without the written permission of the Publisher.
